

Senior / Principal Acoustic Consultant Renewables Projects

Logika Group

Location: Bristol, Leeds, London or Warrington

Role Location

The role would be primarily office based. Occasional travel may be required for specific project needs.

The Company

Logika Group is a leading independent environmental consultancy, underpinned by a growing team of experts in environmental policy, strategy, design, and assessment.

With offices in London, Bristol, Warrington, Brighton, Leeds and Belgium, Logika Group comprises four specialist sister companies: Logika Consultants, Air Quality Consultants, Noise Consultants, and Logika Europe.

Over the last 30+ years, we have achieved sustained growth and honed our provision of high-quality services, while securing a large volume of repeat business from satisfied clients. We were recognised as a 'top 25 leading player' in UK Environmental and Sustainability Consulting by Environmental Analyst.

We pride ourselves on being able to:

- Employ the best people to provide the highest quality advice
- Provide a personal service
- Deliver meaningful work to a high technical standard, which protects and improves the environment
- Design innovative cross-disciplinary solutions

With a proven track record of success, Logika Group has been involved with UK Government expert groups and European Commission working groups, provided expert evidence at Public Inquiries, and helped clients gain planning consent for thousands of projects.

Logika Group is underpinned by our values of Community, Collaboration and Integrity – developed by our staff members to reflect our shared principles, approach to our work, and positive company culture.

The Role

We're looking for an experienced Senior to Principal Acoustic Consultant to join our growing energy and

renewables team. You'll play a key role in delivering high-impact acoustic assessments for renewables projects, including EIA and DCOs, and complex multi-disciplinary planning applications. You'll have a senior role embedded in expert modelling teams, developing and applying bespoke assessment frameworks, and crafting compelling narratives that support successful planning outcomes. Your work will span stakeholder engagement, expert witness contributions, and the development of analytical tools that shape decision-making at the highest level. This is a chance to work across diverse renewable project types.

We're looking for someone with experience in environmental acoustics, particularly onshore wind or solar projects. Experience with battery storage is a plus. You may have led modelling work, written reports, or engaged with stakeholders; any combination is valuable. You don't need to tick every box. Whether you bring technical depth, project insight, or stakeholder experience, we're keen to hear from you. A postgraduate degree or chartership is a bonus, but not essential; curiosity, collaboration, and clear thinking matter most.

Skills and experience we are looking for

Candidates will need to be able to work on their own and as part of a team, sharing responsibility for the management of both projects and staff.

Key Skills

Ideal candidates will be able to demonstrate experience in all or most of the following:

- Acoustic Expertise: Strong interest & experience in environmental acoustics.
- **Project Experience**: Energy and renewables project experience, particularly onshore wind or solar projects, ideally including modelling & report writing.
- **Communication**: Excellent written & oral communication skills, able to produce clear & concise reports.
- **Collaboration**: Ability to work effectively within multi-disciplinary teams
- **Technical Skills**: Proficient in data analysis & interpretation.
- **Regulatory Knowledge**: Understanding of UK/international noise legislation.
- Software: Proficient in MS Excel & Word.
- **Site Work**: Willingness to undertake site/field work.
- **Self-Starter**: Proactive, detail-oriented, & able to prioritise deadlines.
- Clear Thinking: Strong problem-solving and analytical abilities.

Ideal candidates will be able to demonstrate skills and expertise in some of the following desirable experience:

- Consultancy Experience: Track record in consultancy (as long as experience in a related field, e.g. academia, can be demonstrated).
- **Technical Management**: Experience managing noise assessments.
- Stakeholder Engagement: Experience engaging with stakeholders.

• **Driving License**: Full UK driving license (travel required).

Qualifications:

• **Education**: Postgraduate degree in science or engineering-based discipline, or relevant chartership.

Membership: Relevant professional institutions, such as the Institute of Acoustics.

What we offer

We are a growing Group of companies that wants to do things differently, with an exciting future that will help you shape and realise your ambitions. You will have a great opportunity to work with a talented and dedicated team and be able to develop your career as the company grows.

Alongside a competitive salary, we offer a range of formal benefits and training, and development programmes to enhance employee satisfaction and professional development. These include, an enhanced pension scheme, private medical insurance, competitive annual leave entitlement which grows with length of service, additional annual leave purchase scheme, rail and bus season ticket loans, cycle scheme, group life assurance, staff training and CPD programme, employee recognition awards, social value programme and more.

Furthermore, we ensure we can support our employees through offering wellbeing programmes and policies that support individuals. These include flexible working, trained mental health first aiders, and readily available support through our Employee Assistance programme.

Logika Group's Equal Opportunities Policy is to ensure that no applicant receives less favourable treatment on the grounds of age, disability, gender, reassignment, marriage and civil partnership, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

How to apply
