

Air Quality Consultant Senior / Principal Consultant

Air Quality Consultants Ltd

Location: Ideally London or Bristol but would consider applications for Leeds, Warrington and Brighton.

Role Location

The role would be office based, ideally in our London or Bristol offices. Occasional travel may be required for specific project needs such as meetings.

The Company

Logika Group is a leading UK-based independent environmental consultancy, underpinned by a growing team of experts in environmental policy, strategy, design, and assessment.

With offices in London, Bristol, Warrington, Leeds, Brighton and Belgium, Logika Group comprises of four specialist sister companies: Logika Consultants, Air Quality Consultants, Noise Consultants and Logika Europe with the Environmental Policy and Economics team working horizontally across the Group.

Over the last 30+ years, we have achieved sustained growth and honed our provision of high-quality services, while securing a large volume of repeat business from satisfied clients.

As such, we pride ourselves on being able to:

- Service a wide range of our clients' needs
- Employ the best people to provide the highest quality advice
- Provide a personal service
- Deliver innovative cross-disciplinary solutions
- Respond quickly and efficiently
- Offer value for money

With a proven track record of success, Logika Group has been involved with UK Government expert groups and European Commission working groups, provided expert evidence at Public Inquiries, and helped clients gain planning consent for thousands of projects.

The Role

To support our continued growth, we are seeking to recruit a Senior/Principal Air Quality Consultant.

The successful candidate will support a wide range of on-going projects across sectors including transport,

energy, aviation, industry and government. You will have a client-facing role with responsibility in terms of managing project teams and project delivery. You will lead and contribute to the development of proposals for new work and for large and complex public and private sector tenders.

You will be involved in overseeing and delivering stand-alone air quality assessments for new developments, preparing chapters for Environmental Statements including those that form part of Development Consent Order (DCO) applications and undertaking leading edge research projects.

You will require detailed practical experience of atmospheric dispersion modelling, particularly for transport and industry. In addition, you should have a good understanding of ambient air quality monitoring methods for both particulate and gaseous species, and experience reviewing and critically evaluating ambient monitoring results.

In this role, you will work closely with our senior team of experts to train and mentor junior staff, supporting their professional development while also having the opportunity to take on line management responsibilities.

This is an exceptional opportunity at an exciting time both for our business and for environmental consultancy. With us, you will be involved at the heart of the team and will play a key role in the delivery of our work. You will work in a friendly, supportive environment and will be given one to one support, mentoring, learning and development via experienced colleagues. External training will be provided where required.

Skills and experience we are looking for

Essential

- Significant experience in the technical management of large and complex air quality assessments
- Expert in atmospheric dispersion modelling, particularly for the assessment of air quality impacts related to major transport and industrial infrastructure
- Wide understanding of ambient air quality monitoring methods
- Working knowledge of Geographical Information Systems (GIS)
- Track-record in the consultancy sector with strong customer focus
- Good communication skills, both orally and in writing
- Strong technical capability and ability to review and interpret data
- Full UK driving licence.

Desirable:

- Odour monitoring and modelling experience
- Experience of developing GHG inventories and considering climate change impacts
- Environmental permitting and regulator liaison experience
- Experience of working with other environmental disciplines including noise and biodiversity
- Recent programming, machine learning, statistics and optimization experience

Qualifications:

- Relevant A-Levels or equivalent
- BSc or higher in an appropriate science-based discipline

- Membership of relevant professional institutions, such as IAQM will also be taken into account.

What we offer

We are a growing Group of companies that wants to do things differently, with an exciting future that will help you shape and realise your ambitions. You will have a great opportunity to work with a talented and dedicated team and be able to develop your career as the company grows.

Alongside a competitive salary, we offer a range of formal benefits and training and development programmes to enhance employee satisfaction and professional development. These include, enhanced pension scheme, private medical insurance, competitive annual leave entitlement which grows with length of service, additional annual leave purchase scheme, rail and bus season ticket loans, cycle scheme, group life assurance, staff training and CPD programme, employee recognition awards, social value programme and more.

Furthermore, we ensure we can support our employees through offering wellbeing programmes and policies that support individuals. These include flexible working, trained mental health first aiders and readily available support through our Employee Assistance programme.

Logika Group's Equal Opportunities Policy is to ensure that no applicant receives less favourable treatment on the grounds of age, disability, gender, reassignment, marriage and civil partnership, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

Our Values

Logika Group is underpinned by three clear values – **Community, Collaboration and Professionalism & Integrity** - developed by our staff members to reflect our shared principles, approach to our work and positive company culture.

How to apply
