

Environmental Consultant (Aviation & Data Focus)

Logika Group

Location: London, Bristol, Warrington, Leeds or Brighton

Role Location

The role would be office based in London, Bristol, Warrington, Leeds or Brighton. Occasional travel may be required for specific project needs such as meetings.

The Company

Logika Group is a leading independent environmental consultancy, underpinned by a growing team of experts in environmental policy, strategy, design, and assessment.

With offices in London, Bristol, Warrington, Brighton, Leeds and Belgium, Logika Group comprises four specialist sister companies: Logika Consultants, Air Quality Consultants, Noise Consultants, and Logika Europe.

Over the last 30+ years, we have achieved sustained growth and honed our provision of high-quality services, while securing a large volume of repeat business from satisfied clients. We were recognised as a 'top 25 leading player' in UK Environmental and Sustainability Consulting by Environmental Analyst.

We pride ourselves on being able to:

- Employ the best people to provide the highest quality advice
- Provide a personal service
- Deliver meaningful work to a high technical standard, which protects and improves the environment
- Design innovative cross-disciplinary solutions

With a proven track record of success, Logika Group has been involved with UK Government expert groups and European Commission working groups, provided expert evidence at Public Inquiries, and helped clients gain planning consent for thousands of projects.

Logika Group is underpinned by our values of Community, Collaboration and Integrity, developed by our staff members to reflect our shared principles, approach to our work, and positive company culture.

The Role

We are seeking a motivated and talented Environmental Consultant (Aviation & Data Focus) to join us at an exciting time of growth.

This unique role sits at the intersection of our **Acoustics** and **Data & Digital** teams. While you will support key aviation projects, including airspace change and managing aviation environmental impacts (such as noise, emissions, and sustainability metrics), your primary focus will be leveraging data science and digital tools to solve complex environmental challenges.

Rather than just running technical models, you will play a key role in translating complex environmental data into clear, visual, and accessible insights that help clients and communities understand impacts on people, health, wellbeing, and policy.

Crucially, you will not work in a silo. While embedded within our **Acoustics** and **Data & Digital** teams, you will actively collaborate with and support multidisciplinary teams across the wider Logika Group (including air quality, climate change, and environmental planning). This offers an exceptional opportunity to broaden your professional skillset, gain exposure to diverse high-profile projects (from aviation to renewables and major infrastructure), and grow your career within an agile, innovative consultancy.

Skills and experience we are looking for

Candidates will need to be able to work on their own and as part of a team, sharing responsibility for the management of both projects and staff.

Key Skills

Ideal candidates will be able to demonstrate experience in all or most of the following:

- **Data Analysis & Synthesis:** Strong mathematical, quantitative, and data synthesis skills.
- **Programming & Digital Tools:** Experience with (or a strong desire to develop skills in) programming languages or data visualisation tools (e.g., Python, R, GIS, PowerBI) to manipulate complex datasets.
- **Acoustic Fundamentals (Desirable):** A foundational understanding of environmental acoustics and noise propagation principles is desirable, but not essential.
- **Communication:** Excellent written and verbal communication skills, with a talent for translating complex technical data into clear, engaging, and accessible narratives for non-technical stakeholders and the public.
- **Technical & Research Capability:** An analytical mindset with a strong commitment to evidence-based problem solving. An interest in environmental policy, aviation regulations, or Environmental Impact Assessment (EIA) frameworks is highly desirable.
- **Organisational Skills:** Strong organisational skills with the ability to prioritise and deliver work to deadlines.

- **Site Work:** Ability and willingness to undertake site-based and field work.
- **Initiative:** Dynamic self-starter with excellent attention to detail and a passion for environmental problem-solving.

Qualifications

- Hold a relevant qualification(s) in Science, Data Science, Engineering, Economics or other relevant subject.

What we offer

We are a growing Group of companies that wants to do things differently, with an exciting future that will help you shape and realise your ambitions. You will have a great opportunity to work with a talented and dedicated team and be able to develop your career as the company grows.

Alongside a competitive salary, we offer a range of formal benefits and training, and development programmes to enhance employee satisfaction and professional development. These include, an enhanced pension scheme, private medical insurance, competitive annual leave entitlement which grows with length of service, additional annual leave purchase scheme, rail and bus season ticket loans, cycle scheme, group life assurance, staff training and CPD programme, employee recognition awards, social value programme and more.

Furthermore, we ensure we can support our employees through offering wellbeing programmes and policies that support individuals. These include flexible working, trained mental health first aiders, and readily available support through our Employee Assistance programme.

Logika Group's Equal Opportunities Policy is to ensure that no applicant receives less favourable treatment on the grounds of age, disability, gender, reassignment, marriage and civil partnership, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

How to apply

Please apply using the application form on our website – www.logikagroup.com/careers
